## Many Countries. One Uncompromising Standard.

This Seal symbolizes the **Knight Oil Tools Promise** to ensure **excellence** through safety and quality; **integrity** through trust and values; and **leadership** through accountability, innovation and technology for its customers, employees, products and services.

The changing demands of the global oil and gas industry have played an instrumental role in defining the focus of service companies—from the single business line of old to the multi-service lines of today.

Focused on providing “zero-failure” equipment and service, Knight Oil Tools has grown to include Rental Tool Services, Fishing Services, Manufacturing, Inspection and Hardbanding Services and QHSE Training and Consulting service lines.

The company continually broadens its abilities and technologies—worldwide—through organic growth, strategic acquisitions and enhancement of its manufacturing capabilities. However, the attributes that have remained constant since 1972 are the level of experienced personnel, quality equipment, and a commitment to safety and service within each product and service line.

Over the past 40 years, Knight Oil Tools has evolved into a global company that is continuously enhancing our product and service lines to meet our customers’ needs now and in the future. We are committed to servicing our customers wherever they operate—whether that takes us to the shale plays in the United States or basins in S. America, Europe, the Middle East, or Asia-Pacific Region—we plan to be there.

**Rental Tool Services with zero failures means reduced downtime and increased productivity.**

## RENTAL TOOL SERVICES

Many in the industry may feel that there is no difference when renting oil tools. Knight Oil Tools believes there is a difference. We believe that our people, along with our attention to detail in both our Safety and Quality programs, are the reason for Knight Oil Tools' positive reputation around the world. Knight Oil Tools is committed to providing extensive tool selections, quality products, excellent service and an incident-free work environment.

Established in 1972, Knight Oil Tools' Rental Tool Services service line continues to expand and diversify through acquisitions of new inventory and product lines to meet the ever-changing needs of our customers. We supply rental equipment and services for drilling, completion and well control ranging from use on your smallest workover project to your deepest deepwater drilling operation. Knight Oil Tools' strategically located facilities provide customers with access to inventory and delivery in virtually every oil and gas producing region. Adding dimension to our services is our international expansion that will allow fast and dependable deliveries whenever and wherever in the world customers' needs may be.

Rental Tool Services' computerized inventory system allows for full accountability and tracking of our equipment worldwide. With Knight Oil Tools' unique Quality Assurance Protection Plan and KIP® patent-pending inspection program, customers can feel secure, knowing that each tool has been tested and every employee has been properly trained. Knight Oil Tools is committed to a safe work environment, quality rental tools, superior service and zero failures.

## FISHING SERVICES

In 1999, Fishing Services became the second service line of Knight Oil Tools—established to provide the fishing sector the same standards of tools and services the rental sector had grown accustomed to with Knight Oil Tools.

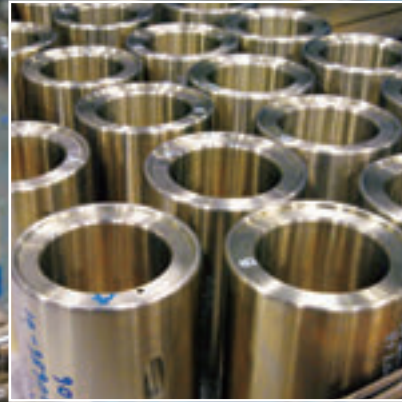

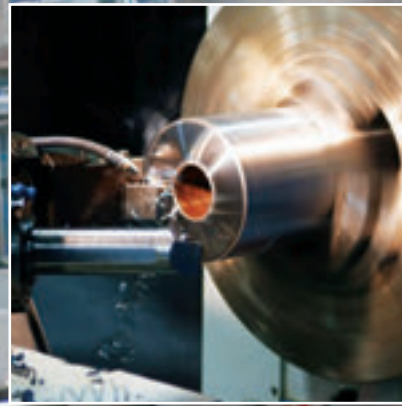

Fishing Services provides a full line of cased-hole, open-hole and thru-tubing tools run by experienced supervisors—proven to be among the best in the business. Knight Oil Tools manufactures technically advanced mills designed to take care of the toughest milling operations in a minimal amount of time; as well as casing cutters that use the same technology for performance in the field that is second-to-none.

Fishing Services' Excalibur™ single-trip whipstock service combines time-proven technology with tools that are consistently produced by Knight Manufacturing, resulting in outstanding performance. With the addition of power swivels, triplex pumps, reverse packages and foam units, Fishing Services maintains a commitment to provide customers with the best tools, equipment and service available in the industry.

Dedicated to the same standards of safe working environments, quality tools and superior services as other Knight Oil Tools service lines, Fishing Services greatly enhances the ability to service customers in the critical area of downhole fishing.

Fishing tools and services are always ready, whenever and wherever you need them.

**Knight Manufacturing designs and fabricates innovative tools and equipment for the oil and gas industry.**

## MANUFACTURING

Knight Manufacturing LLC, a service line of Knight Oil Tools and the producer of the Hub City line of products, offers a wide range of fabrication, repair and services for the oil field. Products produced by Knight Manufacturing include accumulators, pipe and thread protector cleaning machines, portable lathe refacing machines, hydrostatic testers and pipe conveyor systems.

In addition, Knight Manufacturing fabricates many tools used by Knight Oil Tools for use in the drilling and workover sectors, including surface equipment, downhole tools, whipstocks, subs, pipe baskets and various fishing tools.

Knight Manufacturing's strengths include a team of well-trained machine specialists, extensive product capabilities and a commitment to service. The Knight Manufacturing service line continues to establish itself as the hub for providing innovative tools and solutions to the oil and gas industry.

Knight Manufacturing carries on the same standards of excellence that are represented throughout Knight Oil Tools to ensure the highest standards of quality, performance, safety and technology.

Unsurpassed maintenance ensures the pipe on your well can handle the harshest conditions.

## INSPECTION & HARDBANDING

Since 1996, Tri\*Drill Services LLC, a service line of Knight Oil Tools, has been a leading provider of non-destructive inspection and "casing friendly" hardbanding for drill pipe, tubing, bottomhole assembly components and heavy lift and handling equipment. Along with inspection and hardbanding, Knight Oil Tools' Tri\*Drill Services service line also offers pipe maintenance and storage. Inspection units are mobile for both land and offshore operations while hardbanding units are available for land, rig or yard locations.

All NDT inspections are conducted by Level I and Level II specialists certified according to ASNT guidelines and are tested by an independent source, IPIA or a certified ASNT NDT Level III Instructor and follow DS-1 specifications. Tri\*Drill Services also has an ASNT Level III certified inspector on staff.

As a recognized leader in safety training and preparedness, the Tri\*Drill Services service line has implemented an in-house training program to prepare employees to safely handle every situation from tool preparation to environmental issues. Tri\*Drill Services maintains the highest level of AMSE Section 9 safety certification.

Tri\*Drill Services' Broussard, La. facility is the first Fearnley Procter NS-1™ and NS-2™ certified inspection and hardbanding facility in the U.S.

## Safety training results in less downtime and increased cost-effectiveness.

### QHSE TRAINING & CONSULTING

Knight Oil Tools' Advanced Safety and Training Management LLC service line specializes in building custom quality, safety and training programs, safety inspections and comprehensive consulting services to meet customers' needs in the oilfield, communications/tower, utility, construction, food and manufacturing industries.

Advanced Safety's facilities feature a multi-media lecture/class rooms with indoor and outdoor hands-on teaching and testing capabilities as well as towers for vertical climbing and rescue training. Quality, safety and training programs can also be offered at customer facilities, resulting in less downtime and increased cost-effectiveness.

The Advanced Safety service line offers classes in CPR and First Aid to help employees meet OSHA requirements for a safe and healthy workplace that is free of occupational hazards. Crane operator safety courses are designed to provide education to crane operators in safe practices and procedures in all industries. Classes are also offered in Confined Space Entry to teach employees to identify and establish proper entry permit procedures, recognize and control hazards, ventilation, atmospheric monitoring, personal protective equipment and non-entry rescue to comply with OSHA requirements. Electrical Safety, Fall Protection, Forklift Safety, Hazcom, H2S and other courses are also taught through hands-on and classroom teaching methods.
